How it happened

- Serendipitous meeting of Dan and Joshua Roller (part of Sales & Marketing team at IEEE Computer Society (CS, computer.org)) led to discussion of RSEs
- Joshua suggested CS might create an RSE career guide
- Dan brought in US-RSE (us-rse.org) as a co-sponsor & co-creator
- Agreed on 4 experts (Caroline Jay, Manchester; Dan Katz, Illinois; Jeremy Cohen, Imperial; Rinku Gupta, Argonne)
- Experts suggested topics, provided text and ideas
- CS created draft, experts & US-RSE steering committee reviewed, iterated, finished & published

What it is:

- Describes the Research Software Engineer career
- Provides a guide to
 - Needed skills and how they can be learned and practiced
 - How to engage with other RSEs
- Discusses some of the reasons one might choose to become an RSE

Please share it with those who might be interested in an RSE career

For more about RSEs, see us-rse.org or stop by the US-RSE booth (#248)
