A Prototype UK Hospital Software Tool

How could we have done better?

AI Dementia App

Research group has a ML algorithm trained on brain images (MRIs) and cognitive scores to give a prognostic score of the patient having Alzheimer's.

Research Application	———	Hospital Application

But hospitals are complicated!

UNIVERSITY OF CAMBRIDGE

Much Work Elided For Time...

Testing The Finished App

Need:

Testing The Finished App

Need:

- Picture Archiving and Communication System (PACS)

Testing The Finished App

Need:

- Picture Archiving and Communication System (PACS)

- Hardware to run app on

Testing The Finished App

Need:

- Picture Archiving and Communication System (PACS)

- Hardware to run app on

  - On the hospital network
